Professional Summary

Computer Science professional with **1+ year of experience** in backend systems and AI/ML development, proficient in building scalable applications using **Java, Spring Boot, and Python-based LLM frameworks**. Experienced in working with **production-grade applications, REST APIs, and GenAI solutions**, with hands-on exposure to **OpenAI, LangChain, and AWS cloud fundamentals**. Gaining proficiency in DSA, System Design, and Real-world application development.

Work Experience

Programmer Analyst (Cognizant Technology Solutions)

Jun 2025 – May 2026

- **Optimized core business logic and RESTful endpoints** across a distributed **Spring Boot** microservices architecture, resolving **50+ critical production defects** and reducing average API response latency by **~28%**.
- **Engineered and tuned complex SQL queries and indexing** strategies across multi-million-row relational databases, accelerating query execution times by **~40%** and eliminating data inconsistency issues across downstream services.
- **Diagnosed and resolved end-to-end integration** bottlenecks across **12+ microservices** using distributed tracing and API payload validation (Postman, Splunk), slashing Mean Time to Resolution (**MTTR**) by **~35%**.
- **Collaborated with DevOps and QA in an Agile CI/CD environment** (Git, Jenkins) to deliver bi-weekly production releases and critical zero-downtime hotfixes, maintaining **99.9% system uptime** across live environments.

Software Engineer Trainee - AI/ML (Quy Technology Pvt. Ltd.)

Nov 2024 – Feb 2025

- Contributed to **POC-based AI solutions**, including a **Hotel Booking AI Assistant using LLM and vector search (AstraDB)**.
- Built **RAG-based systems using LangChain** for document retrieval and semantic search.
- Designed **FastAPI-based inference pipelines** for real-time AI applications.

Projects

PetPuja – AI Dining Agent [[Project Link](#)] [[Live App](#)]

Sep 2026

- Architected an autonomous dining agent (**PetPuja**) using **LangGraph, FastAPI, and Groq** (GPT-OSS-120B / 20B / Qwen-27B), separating probabilistic LLM intent classification from deterministic backend nodes (order validation, cooking, serving, and inventory mutations).
- Implemented **Human-in-the-Loop (HITL)** transactional workflows using LangGraph's **interrupt()** primitive and **MemorySaver** checkpointer, enabling pre-confirmation order modifications, proactive culinary pairing suggestions, and dynamic piece-level pricing arithmetic for multi-item portions.
- **Engineered a self-healing fault-tolerant execution** graph with per-item retry tracking, automated receipt deductions (\$0.00 charged) for partial kitchen fulfillments, and a multi-model fallback cascade to eliminate rate-limit downtime.

AI Mail Classifier [[Project Link](#)]

Oct 2025 – Nov 2025

- Built an **AI-powered email classification system** using FastAPI and OpenAI GPT.
- Implemented **PII masking using regex and preprocessing pipelines**.
- Improved classification accuracy using **few-shot prompting techniques**.

VEXURA - Vehicle Insurance Management System [[Project Link](#)]

Jul 2025 - Aug 2025

- Developed a **Full-stack Insurance Management System** using HTML, CSS, JS, Spring MVC and MySQL.
- Designed APIs for **policy lifecycle management and claims tracking**.

Tech Skills

- **Languages:** Python, Java
- **Backend:** Spring Boot, FastAPI
- **AI/ML:** OpenAI, LangChain, HuggingFace, LangGraph
- **Databases:** MySQL, Vector Databases
- **Cloud:** AWS (EC2, S3, ELB), Kafka, Redis
- **Version Control:** Git, GitHub
- **Concepts:** OOPs, DSA, REST APIs, RAG, System Design (HLD)

Courses and Certifications

- **AWS Cloud Practitioner Essentials – Amazon Web Services**

Oct 2025

Education

Lingaya's Vidyapeeth

Sep 2020 - May 2024

Bachelor of Technology in Computer Science and Engineering
CGPA : 8.47/10.0

Faridabad, Haryana
